

Kerman Awarded Living Hub Contract for OZ Minerals' West Musgrave Project

28th March 2023

Kerman Contracting Pty Ltd (Kerman) announced today that they have been awarded a contract by OZ Minerals for the design, supply and installation of their West Musgrave Permanent Living Hub, a high standard permanent accommodation village, for their West Musgrave Copper and Nickel Project (WMP). The project is located in the remote West Musgrave Ranges of Western Australia approximately 1,600 km north east of Perth. The construction works are due to commence in June this year.

The project award comes after 12 months of Early Contractor Involvement (ECI), during this period Kerman worked collaboratively with OZ Minerals to develop the design and verify the required budget.

In more detail the contract comprises the design, supply and installation of an administration centre, a kitchen and high quality dining areas to cater for up to 1000 personnel during construction, high standard accommodation units including family accommodation for 350 permanent staff, a Minesite administration centre and emergency response building.

In addition, the project will include a recreation precinct, including an entertainment and wellness hub, an inflatable dome housing cardio and weights areas, park warrior, a multi sports court, golf simulators and a swimming pool. The sports oval will incorporate AFL and soft ball and is also intended to be used for community events.

"We are very pleased with the opportunity to be working with OZ Minerals and being part of the exceptional West Musgrave Permanent Living Hub project. Once completed the village can serve as a home away from home for 350 permanent staff with high standard facilities and as a meeting point for the surrounding local communities," explained Kerman's Managing Director Chris Kerman.

"This project will generate approximately 150 jobs during peak of the construction phase, offering a great opportunity for local workforce."
